VIERA

COLLECTION

AMARA

Luxury Fittings & Shower Systems

VIERA

THE AMARA EXPERIENCE

Where Water Becomes Art

The Amara collection is born from the belief that a bathroom should be more than functional — it should be a place of quiet reverence.

Its sweeping arched spout rises with the confidence of sculpture, while the knurled cylindrical handles invite the touch — offering tactile luxury in every interaction.

Crafted from solid brass and finished to exacting standards, each piece carries a warmth that transforms cold stone surfaces into intimate retreats.

Whether paired with honed travertine or polished marble, Amara brings a golden epoch into the contemporary bathroom — timeless, assured, refined.

VIERA

SHOWER SYSTEMS

The Art of the Ritual

Precision thermostatic control meets sculptural form. The Amara concealed valve — flush with the wall, warm to the touch — commands the shower with a single knurled dial. Paired with the slim cylindrical handshower on its integrated bracket, every element speaks the same quiet language of considered, enduring luxury.

VIERA

SHOWER SYSTEMS

Presence in Every Detail

The Amara shower system commands the space with understated authority. The ceiling-mounted rain head delivers a wide, enveloping flow, while the round concealed thermostatic plate — with its knurled temperature dial — sits flush against the fluted stone tile, becoming part of the architecture.
A complete sensory experience, quietly curated.

BATH FITTINGS

Freestanding Elegance

The Amara freestanding bath mixer carries the collection's sculptural language into the ritual of bathing, its arched spout rising with quiet drama. Finished in brushed gold and paired with a matching hand shower, it turns an everyday soak into something considered — quietly complete.

VIERA

COLLECTION

EVA

Tactile Detail. Timeless Warmth.

VIERA

THE EVA EXPERIENCE

Where Warmth Takes Form

The Eva collection begins where engineering meets emotion — a family of fittings defined not by ornament, but by the quiet luxury of a surface you want to reach out and touch.

Every handle is finished with a precisely knurled collar: a fine fluted ring that catches the light and rewards the hand. Set against clean cylindrical bodies and softly turned spouts, the detail feels considered, never applied.

Shown here in warm Brushed Copper, Eva is offered across six surface treatments — from the glow of Brushed Gold to the depth of Gun Metal — each worked into the same faultless form.

Tactile. Warm. Unmistakably Viera.

VIERA

SHOWER SYSTEMS

The Quiet Cascade

Precision runs deep. The Eva concealed valve sits flush to the wall — its knurled control and slim lever inviting the hand — while the fluted handshower turns an everyday rinse into something measured, warm, and quietly ceremonial. In Gun Metal, restraint becomes character.

VIERA

COLLECTION

MINIMA

Refined Simplicity. Enduring Luxury.

VIERA

THE MINIMA EXPERIENCE

Where Less Becomes More

The Minima collection is born from a single conviction — that true luxury needs nothing more than precision form and honest material.

Each piece is defined by its cylindrical body, pin-thin lever handle, and softly arched spout. Together they create a fitting that disappears into the architecture of the space, letting the room — and the ritual — take centre stage.

Available in six exquisite surface treatments — from the warm depth of Brushed Gold to the quiet authority of Gun Metal — every finish is applied to the same pure underlying form.

Understated. Enduring. Unmistakably Viera.

VIERA

SHOWER SYSTEMS

The Art of the Ritual

Pure geometry meets masterful function. The Minima concealed valve — its oval escutcheon and slender pin lever flush against the marble wall — commands the shower with effortless precision. Overhead, the round rain head delivers a cascade of stillness. A system built not merely to perform, but to transform every moment beneath it into something ceremonial.

VIERA

COLLECTION

ROMA

Sculpted Warmth. Timeless Form.

VIERA

THE ROMA EXPERIENCE

Where Stone Meets Gold

The Roma collection draws its character from travertine and warm brass — surfaces shaped by time, finished with quiet precision.

Each piece carries a softly rounded silhouette and a sculptural presence, pairing the tactile warmth of natural stone with the enduring shine of brushed gold.

From the single lever basin mixer to the full shower column, every fitting is engineered for smooth, lasting performance.

Bold. Tactile.

Unmistakably Viera.

VIERA

SHOWER SYSTEMS

Warmth, Channelled

Brushed gold meets honed travertine. The Roma thermostatic column delivers a wide overhead cascade and a sculpted handset, while the concealed valve sits flush and quiet beneath the stone — a ritual built for warmth, in every sense.

VIERA

CONCEALED FITTINGS

Precision, Concealed

Behind the wall, total command. The Roma diverter and hand shower bracket sit nearly flush against travertine, their knurled detailing the only hint of the mechanism within — quiet engineering for an uncluttered wall.

COLLECTION

RETA

Architecture in Every Detail. Precision in Every Finish.

VIERA

THE RETA EXPERIENCE

Where Form Commands Function

The Reta collection is a study in architectural restraint — each fitting defined by its sharp rectilinear geometry, flat-blade lever, and precision-machined body. Where curves yield to corners, and softness gives way to structure.

Every line is intentional. The square escutcheon plate, the angular spout, the blade handle that sits perfectly parallel to the wall — these are not ornamental choices but the result of an obsessive commitment to form as function.

Available in six surface treatments — from the industrial authority of Gun Metal to the warm opulence of Brushed Gold — each finish transforms the same architecture into a new character.

Uncompromising. Architectural. Unmistakably Viera.

VIERA

SHOWER SYSTEMS

Precision. Delivered.

The Reta concealed valve sits flush and sovereign against tile or stone — its square escutcheon and blade lever the geometry of control. Above, the wall-mounted rain head extends with architectural authority, releasing a curtain of water that transforms every shower into a space of deliberate, unhurried calm.

VIERA

RAIN HEAD SYSTEMS

Where Water Becomes Ritual

Wall-mounted with architectural precision, the Reta rain head extends from the wall on a square-section arm — its flat panel face delivering a broad, even cascade. Every drop deliberate. Every moment, transformed.

COLLECTION

CARA

Tactile Craft. Enduring Luxury.

VIERA

THE CARA EXPERIENCE

Texture, Made Tangible

The Cara collection begins with the hand. A finely knurled cylinder, turned from solid brass, invites the fingertips before the eye has finished admiring it.

Every body carries the same diamond knurl, machined to a precise pitch so the grip stays sure even when wet. Above it sits a slim lever and a softly tapered spout, quiet counterpoints to the worked surface below.

Offered in six hand finished surfaces, from the warm depth of Brushed Gold to the quiet authority of Gun Metal, each applied over the same crafted form.

Tactile. Enduring.
Unmistakably Viera.

VIERA

SHOWER SYSTEMS

The Art of the Ritual

The Cara concealed valve carries the collection's signature knurl into the shower. A diamond cut control turns against a slim round plate with a reassuring, tactile precision. Overhead, a clean round rain head answers with calm. Function you feel, and form you remember.

COLLECTION

SIENA

Graceful Curves. Enduring Luxury.

VIERA

WALL MOUNTED

The Art of Restraint

Set into the wall, Siena lets the basin and the stone take centre stage. A slender curved spout projects cleanly from its flared plate, flanked by two slim levers on Ø60 mm roses. The valve body stays concealed behind the finished wall, leaving only line, light and material — a quieter way to frame the daily ritual.

VIERA

COLLECTION

LUNA

Sculpted by Light. Defined by Form.

VIERA

THE LUNA EXPERIENCE

The Geometry of Calm

The Luna collection is a study in considered geometry — where the soft cylinder meets the precise edge, and every surface is placed with intent.

At its heart is the signature blade spout: a flat, tapered channel that carries water in a single clean ribbon. Fluted collars and a finely knurled base add tactile rhythm, catching the light along their machined grooves.

The slim lever sits level and low, an architectural counterpoint to the rounded body. Together they compose a fitting that feels engineered, yet quietly warm.

Offered in six precious finishes — from the candlelit glow of Brushed Gold to the depth of Gun Metal — each treatment settles over the same exacting form.

Structured. Luminous.
Unmistakably Viera.

BASIN MIXERS

Poised in Light

Set against boldly veined marble, the Luna basin mixer holds the eye with its slim blade spout and finely knurled collar. In Brushed Gold, every machined groove gathers the candlelight — turning an everyday wash into a quiet act of luxury.

COLLECTION

KITCHEN

Precision Engineering. Everyday Ritual.

VIERA

THE KITCHEN EXPERIENCE

Where Form Meets Function

The Kitchen Collection brings the same uncompromising precision of Viera's bathroom fittings to the heart of the home -- where daily ritual and considered design meet.

Each mixer is engineered with a pull-down spray head and a slender single-lever control, finished in six surface treatments that move fluidly from warm metals to deep mattes.

Paired with handcrafted undermount sinks in brushed stainless steel or graphite, every basin is formed for silence, durability, and effortless daily use.

Considered. Functional. Unmistakably Viera.
